

Web Challenge Sample 1 - Junior

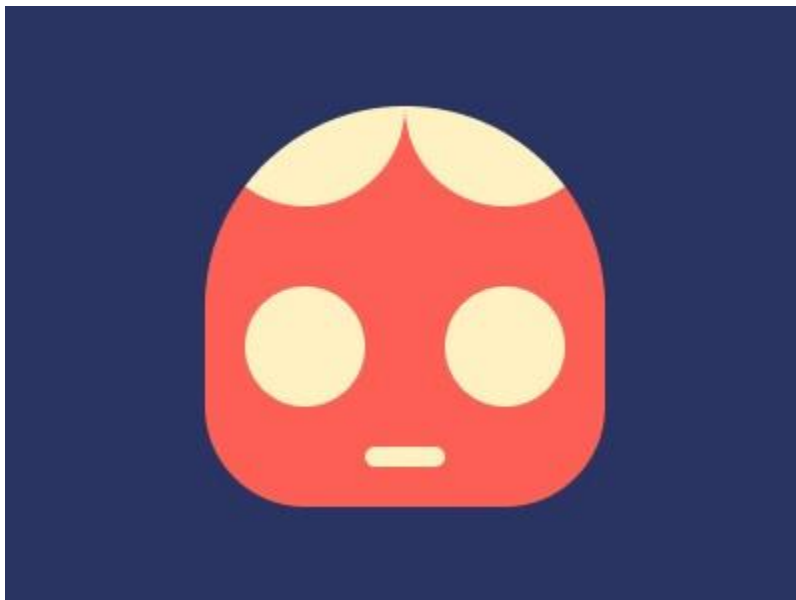

Overview:

A reputable and creative film production company dedicated to bringing captivating storytelling to audiences worldwide. With a passion for innovation and a commitment to excellence, we are embarking on a new project—a cartoon film that promises to enchant viewers of all ages. As part of our team, we are seeking a talented Web Designer who specializes in using HTML and CSS to create a new character for our upcoming film.

Mission:

As a talented web designer, design a new character that aligns with the artistic direction and vision of the film. Utilize your creative expertise to work on this character that aligns with the film's concept, storyline, and character requirements.

After a big discussion with the company managers, they decided to choose this lovely character. You are hired to start working on this project. This new character is the main character in this film, be aware that they need this design in a professional way. Good Luck!

Useful Hints:

- Use your knowledge in HTML & CSS languages to implement this character.
- Use these chosen colors by the company which are:
 - Background color: #293462
 - Face color: #fd5f54
 - Eyes color: #fff0c2
- Take care of all the details shown in the drawing (character)

Web Challenge Sample 2 - Junior

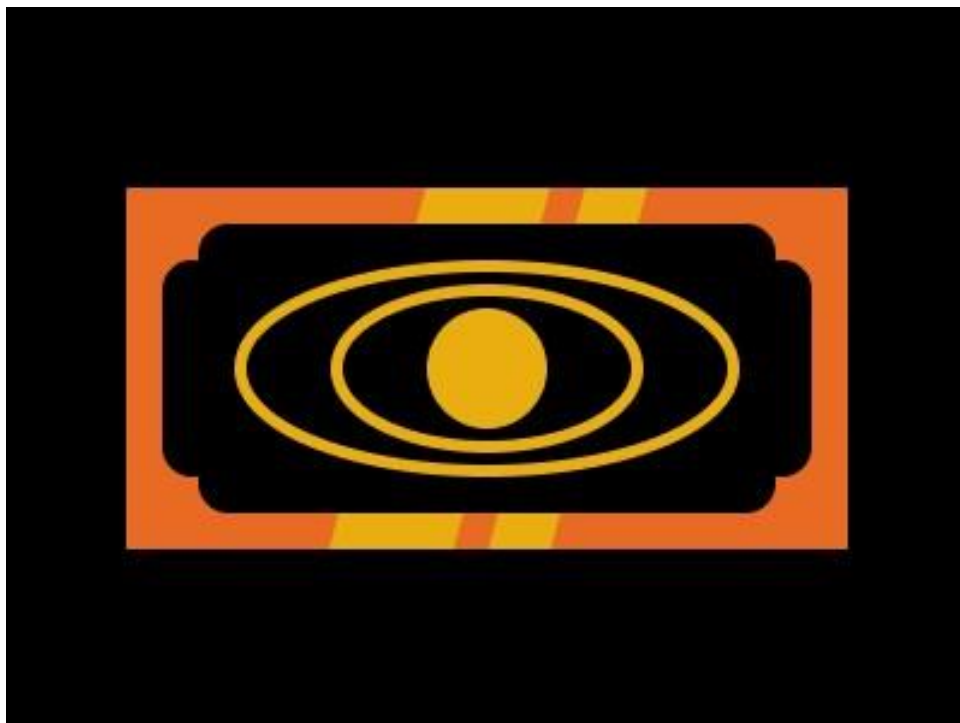

Overview:

A game company that focuses entirely on creating an amazing virtual reality game is searching for a talented Web Designer with a specialization in HTML and CSS. This person will have an important job creating a brand-new money system for the game's virtual world.

Mission:

As a skilled web designer, your task is to create a new currency design that fits perfectly with the vision of the virtual world in this game. Your creative talents will be use in crafting a design that meets the company's requirements.

After extensive discussions with the company's managers, they have settled on a beautiful design for this currency. You've been hired to kickstart this project. Keep in mind that this new currency is the primary one in the game, so it needs to be designed professionally. Best of luck with your work!

Useful Hints:

- Use your knowledge in HTML & CSS languages to implement this design.
- Use these chosen colors by the company which are:
 - Background color: #000000
 - Primary color: #e96a23
 - Secondary color: #eaae10
- Take care of all the details shown in the drawing (currency)

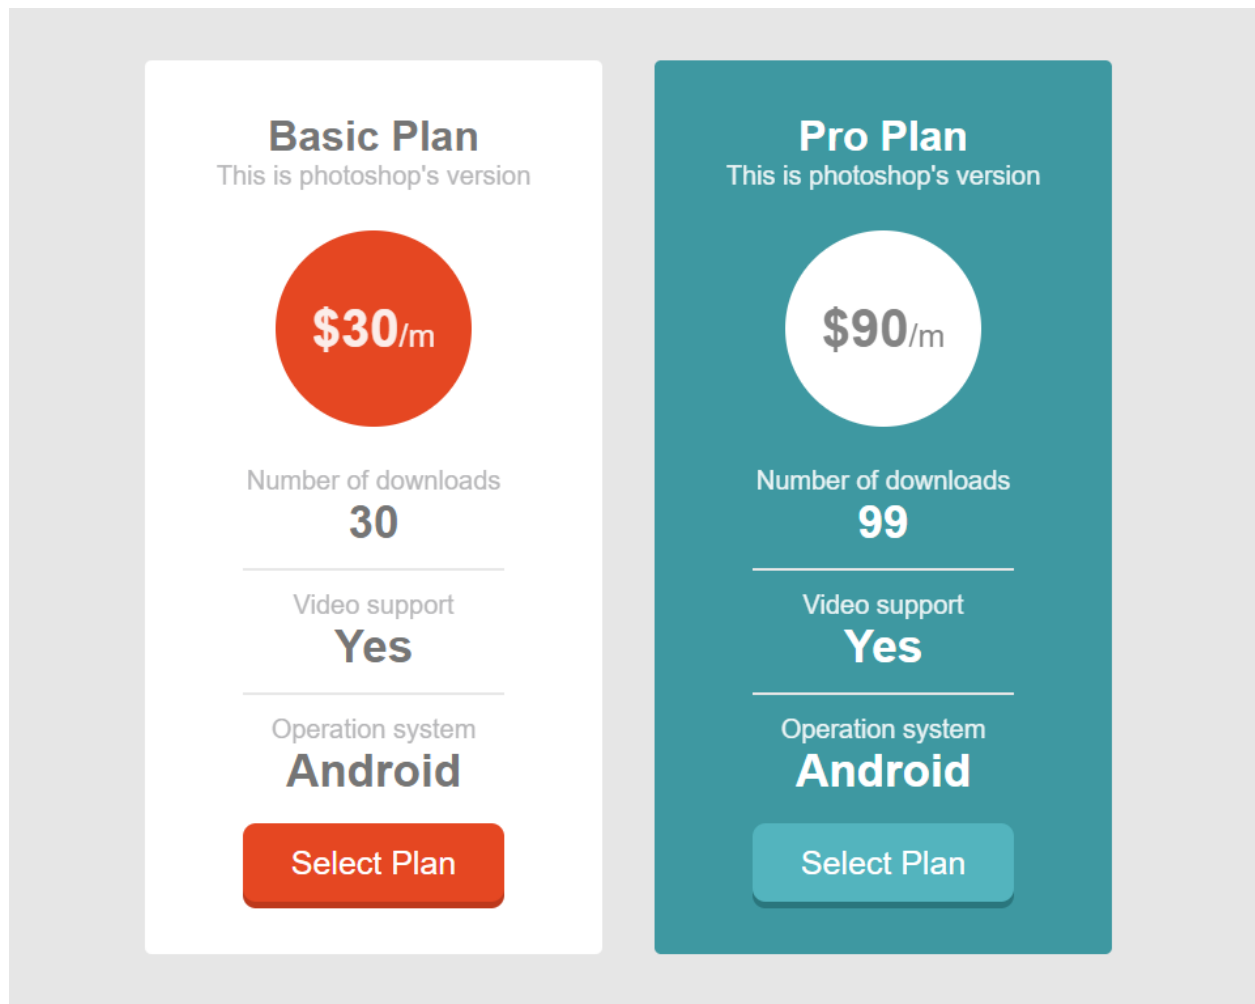

Web Challenge Sample 3 - Junior

Overview:

An online services company is actively seeking a highly talented Web Designer with a specialized expertise in HTML and CSS. This pivotal role involves the creation of a brand-new, visually captivating pricing plan design for their website.

Mission:

As a proficient web designer, your responsibility is to design a new pricing plan layout that aligns seamlessly with the company's requirements. Your creative abilities will be put to use in creating a design that meets their needs.

Following in-depth discussions with the company's management, they have chosen an appealing design for this endeavor. You've been brought on board to initiate this project. It's essential to bear in mind that this new design will take center stage on their website, so it must exude a high level of professionalism. Best of luck with your project!
