New Lollipop Design

Overview:

A sweets company is preparing to launch a new lollipop and wants to introduce a fun, eye-catching character on the product's packaging. They need a fresh and lively design that will appeal to children and stand out on the shelves. This character will be prominently featured on the lollipop wrapper and used across their branding and marketing materials. The company is looking for a talented Web Designer to bring this design to life.

Mission:

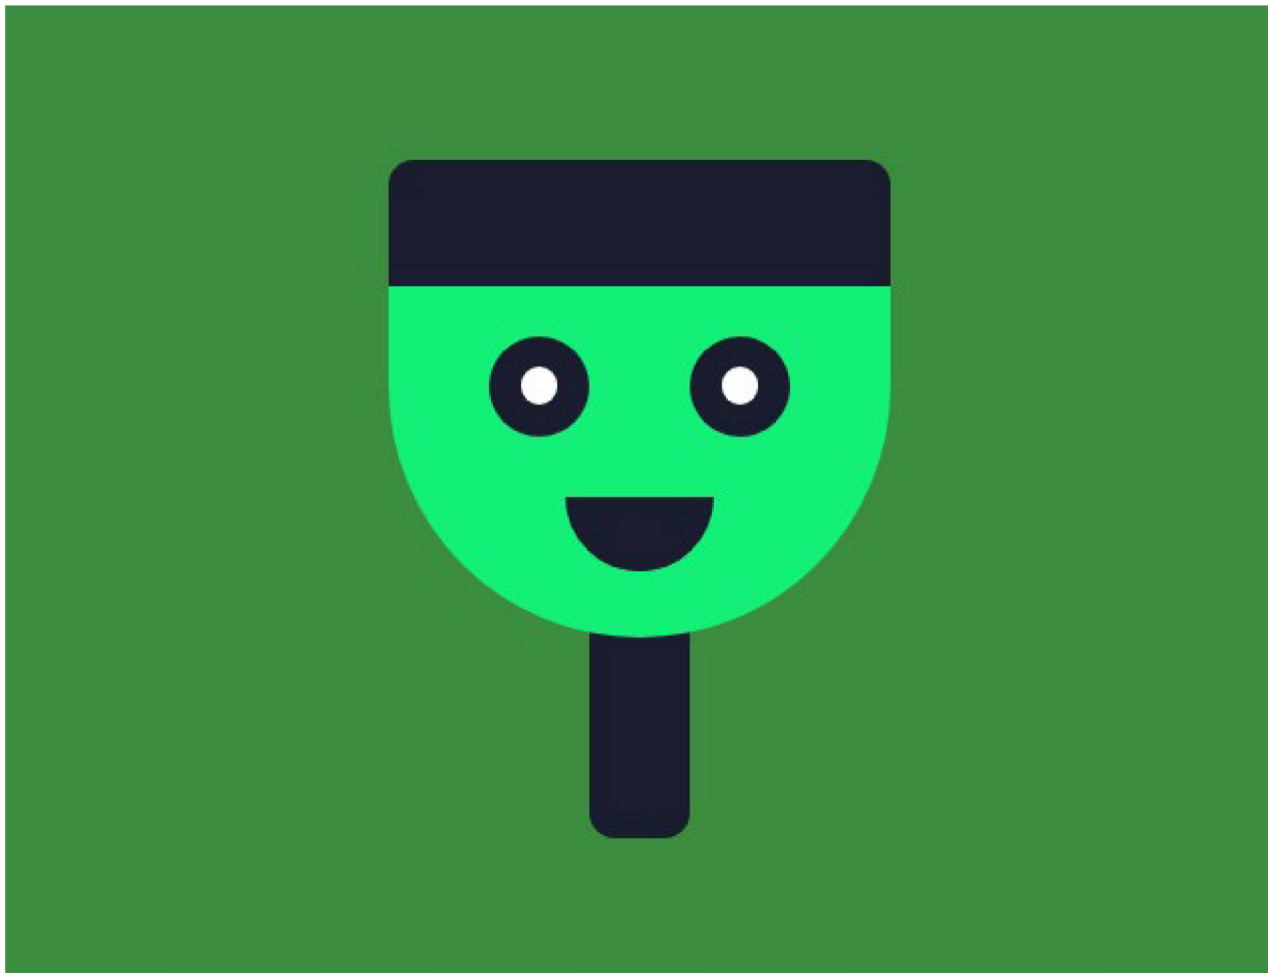

As a Web Designer, your task is to design a unique and playful character for the lollipop cover. The character should embody the fun and sweetness of the product, using HTML and CSS only. The design must attract children while maintaining a vibrant and colorful look that matches the company's branding.

Useful Hints:

- Use your knowledge of HTML and CSS to implement the character design for the lollipop cover.
- Refer to the provided color scheme:
 - **Wrapper Background Color:** `#3c8d3f` (for a sweet appearance)
 - **Character Main Color:** `#14f078` (to make the character pop and be fun to look at)
 - **Dark Details:** `#1a1d2f` (to highlight key features and details)

Expected Output:

1. A visually fun and lively character design that represents the new lollipop product.
2. The design should be implemented using only HTML and CSS, without relying on image files.

Bonus part:
