New Pricing Plans Design

Overview:

A company providing bandwidth, storage, accounts, and support services is launching a new set of pricing plans. The plans will feature three distinct options, offering different levels of service. The company is looking for a Web Designer to create a visually appealing and user-friendly pricing plan section for their website. The design must clearly differentiate between the three plans, using colors and layout to emphasize each plan's details and features.

Mission:

As a Web Designer, your task is to design a clean and professional pricing plan section using HTML and CSS. The design will feature three plans, each in its own box, with a rotated grey box behind each plan for emphasis. The boxes will display the plan name, the bandwidth, storage, number of accounts, and level of support offered. The design must be visually engaging and adhere to the company's branding.

Useful Hints:

- Use your knowledge of HTML and CSS to create this pricing plan layout.
- Refer to the provided color scheme:
 - Background Color: **#eee** (for a neutral page background)
 - Box Background Color: **#fff** (to make the plan details stand out)
 - Header Background Color: **#f6f6f6** (for a soft contrast in headers)
 - Grey Rotated Box: **#e4e4e4** (to add subtle emphasis behind each plan box)
 - Active Green Background Color: **#2ecc71** (to highlight a plan when hovered)
- Use the following icons for arrows:
 - **Left Arrow: ←**
 - **Right Arrow: →**

Expected Output:

- A clean, professional pricing plan section featuring three distinct plans.
- Each plan should clearly outline the bandwidth, storage, number of accounts, and level of support provided.
- The design must be implemented using only HTML and CSS, without relying on image files.
- The standard plan is the featured plan, and it is already with a green background.

Pricing Table					
BASIC	STANDARD	UNLIMITED			
\$99.99/MON	\$199.99/MON	\$299.99/MON	→ 2GB Bandwidth ←	→ 10GB Bandwidth ←	
→ 150GB Storage ←	→ 250GB Storage ←	→ 500GB Storage ←	→ 12 Accounts ←	→ 50 Accounts ←
