WhatsApp Laughing Emoji Design

Overview:

WhatsApp is looking to update the design of the laughing emoji in their emoji list. The new design should incorporate an animated element to make it more engaging. The animation should trigger on hover, where the emoji's eyes shrink, and the mouth moves up and down continuously. The company is seeking a talented Web Designer to implement this emoji design using HTML, CSS, and basic animations.

Mission:

As a Web Designer, your task is to design a new laughing emoji for WhatsApp's emoji list. This emoji should have a fun and animated element that activates when hovered. The animation will involve the eyes shrinking and the mouth moving up and down in a loop. The design must be created using HTML and CSS and should visually align with the other emojis in WhatsApp's collection.

Useful Hints:

- Use your knowledge of HTML and CSS to create the emoji and its hover animation.
- Colors to use:
 - Face Background Color: **#f2dd68** (for the main face color).
 - Eyes Color: **#995710** (for the eyes and the mouth).
 - Mouth Main Color: **#995710** (for the main mouth area).
 - Teeth Color: **#fffae6** (for the visible teeth when the mouth moves).
 - Tongue Color: **#d8aa2b** (for the tongue inside the mouth).
- Implement the hover animation using CSS to:
 - Shrink the eyes on hover.
 - Continuously move the mouth up and down while hovered.

Expected Output:

- A visually engaging and animated laughing emoji that aligns with WhatsApp's existing emoji style.
- The emoji must be implemented using only HTML and CSS, with the animation triggered on hover.

On Hover – The mouth moves up and down Continuously:
